Examiners to Focus on Preparedness

Credit unions have both a fiduciary and a philosophical duty to make sure their services are available to members under any circumstances. To live up to that promise, credit unions need to plan for a wide range of potential conditions and be prepared to respond in an orderly and productive manner.

We often think about disaster planning in terms of events – fire, earthquake, snow. But a better way to approach planning is to ignore the possible causes and think in terms of planning for symptoms.

	Human	Physical	Technical
Short Term	 Illness or strike impacting 20% of staff for less than 1 week Unable to show up (due to snow, ice, rail or truck spill, major accident that closes major artery) 	 Fire to building or neighboring building Crime scene Flood Vehicle runs into building Protest or civil unrest in area 	 Power outage Computer glitch Power or phone lines temporarily down due to wind Correspondent bank unavailable Wire system down
Long Term	 Illness incapacitating 25% or more of staff for more than 1 week Death of several key people Pandemic Availability (staff relocated out of area or caring for their families) 	 All area offices are uninhabitable Offices and contents are destroyed or contaminated Area is quarantined Members desperate for cash and access to accounts 	 Regional power outage Computers unavailable No phone lines Currency is contaminated ATMs down Safe destroyed

It really doesn't matter if you lose your branch building due to fire, flood, chemical spill, or other cause. Being prepared means that, for example, if your branch building becomes uninhabitable, everyone knows what to do or who to call. The terrorist attacks on the Murrah Federal Building, September 11, 2001, the recent devastation from hurricanes Katrina and Rita are reminders that the financial industry must be ready for a disaster of any magnitude or duration.

DFI and the various Federal financial institution regulators are requiring financial institutions to develop and test "disaster recovery" and "business continuity" plans. Each plan must spell out how the credit union will recover data, ensure the availability of cash, continue customer service, and otherwise function efficiently after a disaster. In the past we saw many plans which assumed that the credit union could be operational in a short period of time at the same location. After recent experiences, examiners will be looking for plans which cover conditions in which personnel are unavailable, key facilities are closed, and power and phones are out for an extended period. The questionnaire attached to NCUA Letter to Credit Unions 06-CU-12 includes a specific listing of the steps the examiners will be expecting at their next exam.

Credit unions play a vital role in supporting the economy, businesses and individual families after a disaster. It's in everyone's best interest that credit unions bounce back quickly and that disruptions are minimized. This can be best accomplished through planning, communication, and testing.

DCU will be hosting *Disaster Recovery Workshop*, on December 7, 2006, at the Sea-Tac Hilton, to discuss examiner expectations and provide resources to help you become compliant. This <u>free</u> conference will include a CEO from a Katrina ravaged credit union in New Orleans; representatives from the Department of Health, Federal Reserve, Northwest Corporate, the Red Cross; and have many handouts and resource lists you will not want to miss. Additional information is available at http://www.theparagongroup.com/?pg=SDoCU_Overview or http://www.theparagongroup.com/SDoCU_register.aspx.

We encourage you to send a couple of representatives to this workshop and we promise to make it a worthwhile experience.

Preparing for Disaster: A Forum on Disaster and Contingency Planning

Presented by the Division of Credit Unions Feallitated by: The Peregon Consulting Group, LLC

Thursday, December 7, 2006 - See-Teo Hilton Hotel

Speaker(s) Time	marada), beveriber	r, 2000 - Ser i eo i mion i mion
